J. C. Aven & Co. ients: I feel it my duty to neknowledge what you sarsaparilla has done for me Having inherited a serofulous infection, I have auffered from the trouble of the translation of the serogeneous series of the serogeneous series and the serogeneous series and conservations of the serogeneous series and covered my seal aid ears with one sore, which was painful and loadseine beyond description. It fried many medicins and several physicians, but without, much relicitor anything. In fact, the disorder grew worse, At length I was rejoiced to read in the Gospel Masenger that you had prepared an alterative (Sarsaprilla), for I knew from your reputation that anything you made must be good. I sent to Cincinnati nd got it, and used it till it cured me. I took it, asyou advise, in small doses of a tenspoorfill, over a sont, and used affinest three bottles. Kew and heathy kin soon began to form under the seab, whice after a while fell off. My skin is now clear, and I know by my feelings that the disease hisgone from my system. You is, and the disease hisgone from my system. You can well believe that I feel what a a saying when I tell you, that I hold you to be me of the apostes of the ago, and remain ever gratefully— Yours.

### The Cometery.

We are glad to see that there is a movement on foot to improve the condition of the Cemetery in this City; it is a matter that has long been mooted amongst the citizens of all denominations, and the necessity of removing the Cemetery to some convenient locality beyond the City limits, but within a reasonable distance of Victoris, has been frequently urged both upon the Municipality and the Government; want of funds has we suppose prevented either the Municipal or the Colonial Government from taking the matter up, and it has now been deter. mined to endeavor to do by private subscription that which, had the Municipal exchequer been better filled, would doubtless have been undertaken by the Corporation: It is a most desirable thing to have the resting place of the dead, which is used by all sects of Christianity in the city, placed in a proper and fitting state of order and decency, and with this end in view, we trust that those who have taken the initiative in the present proposition to improve the cemetery will not lose sight of the desirability of closing the present burial ground so soon as another site can be obtained in which to locate it; the first step will be to make the present cemetery more attractive by laying it out with trees and walks ; there is but little room for any display of taste in the present burial place, but there is nothing to prevent its being thoroughly drained and so arranged that persons can walk round the enclosure without having to trample over the graves, and to force their way through long grass and weeds. It is observable in England; that since the abolition of intramural burials in large towns, great efforts have been made to improve the closed burial grounds. In England, and the plan adopted in many of the country towns there, might be followed in this City with some success; when the subscription lists were opened, those who preferred giving trees, shrubs and flowers were invited to do so, others gave their labor, so that walks would be made, and fences put up without drawing upon the subscribed fund; many persons in Victoria who may not have the means to subscribe money, might be willing to give their time and labor, we throw this suggestion out for the Committee to act upon. In the large citles of America the cemeteries are now laid cut in the most tasteful manner, and are places of resort for visitors instead of being regarded as charnel houses, as used to be the case in the cities of Europe less than a century ago; and the system has the ground or leasing them, so that a family might secure a certain number of feet for a family burying place. Some such arrangement as this might assist the fund, if one is proposed to be raised, for purchasing ground for a new cometery. We trust that there will be a hearty co-operation amongst all rects so that instead of being a disgrace to our city the cemetery may be one in which all the inhabitants may be able to take an interest. The gentlemen who have taken the initiative deserve the full support of the community, and if the plans suggestare good, we entertain no doubt of their bei g well supported.

A communication from F Sylvester, Se. cretary of Victoria Fire Department annoucing that John Kriemler had been duly elected Chief Engineer, and John Vogel Assistant Engineer of the department, for the ensuing twelve months, and that the said election had been since duly confirmed at a meeting of the Board of Delegates, read. On motion ordered to be received, filed and the necessary certificates to be issued by the Council.

The Sanitary Commission reported an interview had with the Stipendiary Magietrate, respecting the destition of certain Indians attacked with small pox, that that gentleman would undertake to supply the same with necessaries for their care and comioni.

The Council adjourned until Tuesday next 27th inst.

ELECTION MEETINGS .- We are requested to state that the meeting to-night will be held at the Theatre. As it has been found durng yesterday's canvas, that a number of perecute trave green in their numbers, eachieftions already made public, without clearly understanding at the time the issues involved which have been modified by the appearance of other candidates, there is no doubt there will be a large meeting of our cit zens, who are now more anxious than ever to hear the views of the liberal candidates. A meeting of the friends and supporters of Messrs Heimeken and Drake will be beld at the Theatre, to-morrow evening, to hear the views of the respective candidates. A meeting of Messrs DeCosmos and Powell's suppor ers will be held at Esquimalt on Saturday even-

EXTRAORDINARY .- From the Liverpool Mercury of August 8th we learn the extent of the marvellous heat in July, which exceeds previous records in England. The thermometer in the shade ranged from 75 to 89 degrees, while exposed to the sun's rays it rose 120 and 130 degrees. It is mentioned as a singular fact, that while England and America were thus simultaneously scorched, vessels passing between the two countries had been in continuous heavy minfalls. The hottest day in July was the 22d when the mean temperature, including the minimum of the night, exceeded 80 degrees.

ELECTIONEERING .- All parties appear to be thoroughly roused to the importance of the ensuing contest, both as to the merits of the candidates and the lesues involved-if we are to regard the vigor of electioneering as a criterion. The city perhaps never was more closely canvassed, and as it goes on, each city: party speaks with confidence of success. The canvassers yesterday had enough to do to some all the questions put to them as to their respective candidates. Confederation free-trade, reciprocity, drawbacks, retrenchment, protection, tariff, and universal suffrage, have not been so ventilated we venture to say, for a long time.

SPAIN .- The new Spanish Government has ordered the return of the bark Tornado to England, regarding which, serious trouble was likely to have arisen between the two countries, by the decision of the late Spanish Government : further-the payment of damages for wrongful detention, and the imprisonment of the Spanish officials who ordered her seizure.

SANITARY. - Since Monday morning there have been eight white and five indian cases of small pox reported to the city anthorities. The white cases, however, are of a mild form. The indians, when symptons are shown, are immediately removed to the hospital provided for them on the reserve, so that we may hope there will be less mortality amongst them than hitherto.

HAY .- The sloop Thornton arrived yesterday morning from San Juan, with twelve tons of hay. A large steamer supposed, to be the G S Wright, was seen going towards San Juan as the Thornton was crossing over to Victoria.

CHURCH MATTERS .- A telegraphic despatch states: The well known sexton Brown, of Grace Church, N Y, has left the choir on account of some disagreement with the new Rector, in reference to the performance of operatic music by the choir.

FROM SAN JUAN .- The Emma came over from San Juan Island yesterday afternoon. Dr Dickson returned having been over to the American Camp, where he vaccinated seventy-five persons.

POLICE COURT .-- William Holmes, out on pail for some days, on a charge of stealing a coat, fai'ed to appear yesterday; his recognizance \$50 was forfeited.

We were unable to receive further news last night, than that received in the early part of the day, in regard to the San Francisco calamity.

#### Kootenay News to the Close of last Month-Discovery of Rich Mines.

We find the following of importance in the Walla Walla, W. T. Statesman of Oct. 2nd:

Hon. D. M. Drumheller, through from Kootenni in six days, brings the news of the discovery of new and rich mines on a creek distant about 25 miles from the old Kootenai diggings. The discovery had created intense excitement, and miners were deserting their claims and streaming into the new diggings,

The discovery was made in the early part of September by a party of three miners who had been out on a general prospecting tour, and were on their return; somewhat discouraged with the result of their expedition. On their way out they had noticed indications of gold on the creek already described, and on their return they thought they would give it another examination, which resulted in the discovery of the best mines that have yet been found in the Northern country.

The stream on which the gold was found has been named Perry Creek, in honor of one of the discoverers. The creek had been prospected a distance of welve miles and found to pay well the entire distance | The three men who made the discovery pauned out in five days \$225. They had but two pans, and were without conveniences for working to advantage. They took out as much as \$13 to the pan, and in one instance got The gold is coarse, and resembles Kootenai dust, with the exception that the color is a shade lighter. It is estimated to be worth from \$18 to \$19

to the ounce. Mr. Drumbeller visited the mines in person and satisfied himself that they are he washed out himself. The Gold Commissioner had visited the mines and laid over the claims until the first of June. The supply of provisions, &c., at Kootenai is limited, and as a consequence those who go t ere this fall for the purpose of securing claims should go well provided.

Mr. D brought down a number of letters written by parties in the mines to their friends at Walla Walla. We append extracts from two of these letters :

WILD HORSE CREEK, Sept. 20, 1868 FRIEND BENDER :- I take the present opportunity of dropping you a few lines, to let you know that the boys have struck it big, 60 miles from Kooteaui, and there will be a big camp here next spring, I have got a claim in as good a location as there is on the creek, and there is good prospects found every day. If I can, I will secure a claim for you.

Nelson Kelly.

KOOTENAI, Sept. 19, 1868.

FRIEND PAYNE: I write to let you know that there is very rich diggings just struck near Koatenai, which will be more extensive then any mines in British Columbia, and I wish you to come early in the spring, and fetch about fifty crow bars and sledges | I left everything and went, and am well satisfied with my location. If I have a chance to go out this winter, I will, but I think there is not much show, for the new Doctor, there is a pretty good show for him here. Tell the xact truth from the miners, which is from a color to \$18 to the pan. If you take a notion to come, bring an assortment

of all kinds of goods: hes disaster, trust selection ban , to soot at bonn at P. . SMITH.

In addition to above the following confirming the news, was since handed us, and was received by Mr A. Dods of this

big rush in, this fall. "I shall take the tools in and start a shop; I think there is a pretty good chance, I cannot advise you to come up but if you are doing nothing you might take a tramp over; you can get it here, but at the same time cannot advise you; you know how it is in a camp like this, everybody gets excited over a little thing; there were two hun-dred dellars taken out by the prospectors with a pan, which there is about, so you can judge for yourself.

#### San Juan Island.

The Territory of Washington vs Thos Gray and William Graves. Indictment for malicious trespass, filed

Sept 7th, 1866. Application for an alias warrant at the September Term, 1868, of the U.S. District Court, holding terms at Port Townsend, W.

After hearing the argument of council for the respective parties, the Court rendered an opinion on the case, reciting details respectog the joint occupation of the island by the British and American Governments since the lispuré, which so nearly led both countries into a war, concludes as follows:

In the course of the argument to which I

have listened, much stress was laid upon the fact, that, since the treaty of 1846, various acts and things have been done by American citizens and officials in the assertion of the right of sovereignty over San Juan... To this it may be answered that British subjects and officiats have done many things of the same import, and with the same view. These various acts and things may be evidence both parties have claimed the island 1846, but they do not prove that the island in fact belongs to either, or that either may rightfully exercise exclusive jurisdiction over it. Besides, if the Courts of the Ter-ritory have jurisdiction in this particular case, they have it in all cases that may arise on the Island. It an American pitizen may be arrested and tried in this Court for an ollenge alleged to have been committed on San Juan, a British subject may be arrested and tried in like manner for an offence comnitted there. The jurisdiction exists, com-lete and unrestricted, or not at all. Perhaps, a joint civil occupation of the island migh have been established in accordance with the proposition of Governor Douglas, but it weuld have been an arrangement, more As I have already intimated, this.is. not proper time or place to discuss the question of title to San Juan, or to give any constructtion to the first article of the treaty of 1846. It it were, I think it might be shown that the claim made by the United States under the treaty is incontestible. This, however, would have no particular bearing upon the present question. The title to the Islands lying be-Straits is in dispute, and has been since 1846. The right of sovereignty over them is in a state of suspension awaiting the action of the two Governments. San Juan is under military rule, and has been so since 1859. How long this state of things will continue is uncertain. But unless a change is effected before long, it is possible if not probable, that the old controversey between the two Governments about 540 400 as the boundary line, may be reopened and settled anew, either by negotiation or by arguments which diplomatic agents are not accustomed

to use.
Without going into a more extended examination of the question presented, my opinion is, that the present status or condi-tion of San Juan Island is not such as to justify the Courts of this Territory in exercising jurisdiction upon it. The application for an alias warrant must therefore be re-

.anning ka DENNISON, Judge.

### The Election.

EDITOR COLONIST :- I think without exception the citizens of this place are the greatest set of muffs that have ever been troubled with common sense, and I rank myself at the head of them. Yesterday two friends of mine came rushing along, one of them with a paper in hand, saying George sign this! what is it about said I? a requisition in favor of Mr. Drake to stand for Victoria ? I can't, I replied I'm for Dr H lmcken. That's all right said my friend, Drake's on the same side, so I signed it, without reading what it was about; since then I have enlightened my self on the subject. The document states, "That we the undersigned having full confidence, no less in your general character and private ability, than in the soundness of your views on the several important matters, which with form the sabject of discussion before the Legislative Assembly during the ensuing session. &c." Can you imagine that men endowed with any sense could be found to subscribe to such a document? when not one of us ever heard what Mr Drake's views are on Confederation or against it. Mr DeCosmos with all his faults (and I have opposed him) has come out in a straight forward manner and stated his views in his address to the people of Victoria. He is not for rushing into Confederation without we become gainer by so doing. Let us hear what the various Candidates for Legislative honors have to say, and if any of these gentlemen can bring forward more advantageous measures for us than Mr DeCosmos has done, I for one will give them my

SAN FRANCISCO, Oct. 21-A severe shock of earthquake occurred at five minutes before eight o'clock this morning Several persons are reported to have been killed. A number have been wounded by falling walls &c. Heyneman's building on California street is destroyed and many others are seriously injured.

### Third Despatch.

SAN FRANCISCO, Oct. 21-A severe shock of earthquake occurred at five minutes before eight o'clock this morning. Several buildings were destroyed, among which is the Livingston Block, consist ing of a row of one story brick buildings, on the South side of California street below Sansome; most of the buildings which were seriously injured were in this vicinity and their foundations rested upon made ground. Several lives are reported lost -and numbers of people were injuredprincipally by falling wails and by runaway teams. The City Hall which was seriously damaged in 1865 is now in an unsafe condition, and no business will be done to-day. The people are utterly demoralized and panic stricken. The first shock was from East to West and was prolonged beyond any ever felt here before: it was followed by about a dozen light shocks, terminating with a heavy one, and was about as heavy as the great shock in 1865. Business on Front street is generally suspended.

Advices from Oakland report that the long ferry peer was damaged so that cars will not be able to run on it for several days.

## EXTRAORDINARY CURE OF A COUGH

The following letter has been received from WILLIAM BOARDS, Esq., on extensive agriculturit and lland agent, residing at Edmonton; Middlesex:

"Nightingale Hall, Edmonton."
"Dear Sir,—I have recently suffered much from a most violent cough, proceedin." from a tickling in my chest, which no remedy, out of many! resorted to, could allay. My head was constantly ashing, and my whole frame entirely shaken. Having seen the good effects of your Lalsam of Anisced in several members of my family, I purchased a small bottle and, when going to bed at night took a teaspoonful in two tablespoonfulcof water, just warm. The effect was immediate; it arrested the tickling in my chest, I slept well, and arose perfectly restored in the morning, with the exception of debility, arising from faffigue by incessant coughing for some days previous. My cough entirely, left me, and has never returned. Having since heard of a lady in the neighborhood who for a long time had laboured under a most distressing cough, and who had resorted to every remedy within her knowledge, I sent the remainder of the bottle to her; and that long-standing, obstinate, and (as she thought) incurable cough, was perfectly cured. You are at perfect liberty to make what use you may please of this communication, as the contents are strictly true.
